PRESIDENT'S MESSAGE

ACI's 2007 Spring Convention in Atlanta is over! Your Georgia Chapter did us proud by putting on one of the best ACI Conventions ever. We now hold the spring attendance record with 1591 registered attendees for the convention. A great deal of thanks to our Convention Committee for putting on such a wonderful event, the following lists, in no particular order, some of my random thoughts and observations from the Convention:

- **"SPONSORS"** - Thanks to all of our convention sponsors who made this event possible and a very special thanks to Nick Maloof for working so diligently to solicit said sponsor donations.
- **"EXIBITORS"** - We had 41 company and/or organizations represented in the exhibit hall area of the convention; of those 41, 10 were first time exhibitors to ACI. Good comments on attendance and flow were received from all. Olson Engineering had over 90 people in attendance for a NDE demonstration on Monday & Tuesday. Thanks to Frank Lennox for getting the exhibitors and coordinating all of the exhibit activities with ACI International.
- **"TECHNICAL"** - We had +/- 60 in attendance for our Chapter sponsored Technical Session, "Pervious Concrete Application and Design" on Sunday afternoon. Those in attendance heard 6 speakers who covered many new and exciting topics in the world of pervious concrete (material research, placing methods, admixtures, fibers, mix proportions, etc.). Thanks to Gary Knight & Nick Maloof for soliciting the speakers and moderating this wonderful program.
- **"CONTRACTORS"** - We had over 100 attend the Contractor's Day Lunch to here our own Harry Moats speak on "Decorative Concrete-It Doesn't Have to Be Flat Anymore!". In addition, we had many attend a Hard Hat Tour and pervious concrete placement demonstration at the new Southface Eco Office immediately following Harry's lunch presentation. Thanks to Harry Moats, Robin Houghton & Gordon Kenna for helping to put all the Contractor Day events together.
- **"HOT TOPIC"** - We had over 100 in attendance for this Sunday evening technical session on "Cast-in-Place and Post-Installed Anchors". ACI International commented that this was one of the best most well received events in recent memory. Thanks to Kirk Deadrick for coordinating and moderating this event.
- **"GUEST PROGRAMS"** - Many members brought their "better halves" with them to the convention. Thanks to Pete & Mary Lou Tatnall for putting together a wonderful list of guest tour opportunities for this group of special people.
- **"STUDENTS"** - We had a very electrifying group of 20 student teams from colleges across the US, Mexico, Puerto Rico & Canada to enter the FRP Competition on Sunday afternoon. Thanks to all our local sponsors (R/M USA, WP Moore, TEC Services, Buzzi Unicem, SCA, Holcim, Lehigh, Cemex, Thomas Concrete, Stalite & Lafarge) for donating all the "goodie bag stuff" for the Student Raffles held during the competition. A very special thanks to all our chapter members who volunteered to help organize and judge this event: Brent Brandy, Pat Ebersole, Shawn McCormick, Raul Alonzo, Brian Wolfe & Steven Maloof. In addition, we had 140+ students and guests stay over for a very special Student Day Lunch and Awards Presentation on Monday. Bob Harris with the Decorative Concrete Institute gave a very entertaining presentation on "Decorative Concrete-From Fringe Fashion to an In-Vogue Material with Widespread Appeal".
- **"CONCRETE MIXER"** - Words are not enough to describe this most wonderful event. I remember when we started planning for this event over two years ago, having the mixer at the new Georgia Aquarium seemed a most lofty goal. After some heated discussions, hand wringing and sleepless worrisome nights we were able to raise the approximate \$150,000 needed to have the mixer at the Aquarium. I heard not one single negative comment on this event, the facility, food, service atmosphere, etc. etc., in my opinion, were "perfect"!

Date: **Friday, May 25, 2007**

You May Register On-Line:
www.georgiachapteraci.org

Time: *Registration—11:30 a.m.*
Reception— 11: 45 a.m. - 12:15 p. m.
Luncheon—12:15 p.m.

Location: *Sheraton Buckhead Hotel*
3405 Lenox Road, NE
Atlanta, Georgia

Speaker: **Pete Tatnall, FACI**
Consultant
Performance Concrete Technologies

Program: **"Production of Fiber Reinforced Concrete"**

Pete will discuss the new proposed ACI Guide to *Specifying, Proportioning, and Production of Fiber Reinforced Concrete*, ACI 544.3R-XX. He will outline how to specify synthetic, glass and steel fiber reinforced concrete (FRC), and then go over recommended procedures for proportioning FRC to provide workable mixtures that provide the desired hardened properties. Pete will provide recommended procedures for adding and mixing in fibers to achieve a homogeneous, well dispersed mixture that can be placed using all conventional techniques. Finally he will discuss finishing techniques and suggestions for Q/C-Q/A issues.

Pete is a consultant in fiber reinforced concrete and shotcrete, and is immediate past chair of ACI Committee 544 on FRC, and now serves as chair of ACI 506 on Shotcreting. He also is past chair of ASTM C 09.42 on FRC and now serves as chair of ASTM C09.46 on Shotcrete. He has 26 years experience in the FRC industry.
